Vanteck Director Appointments and Technical Advisory Board

Vancouver, B.C. (November 8, 2002) – Vanteck (VRB) Technology Corp. (“Vanteck”) is pleased to announce the appointment of Vincent M. Sorace and Albert Gerry as Directors of the Company. Mr. Vincent M. Sorace has extensive experience in strategic planning, business development and the capital markets. Mr. Albert Gerry holds a Master of Architecture from the University of Manitoba and is currently the President of Zappa Resources Ltd.

Vanteck is also pleased to announce the creation of a Technical Advisory Board and welcomes its first two members, Dr. Martha Schreiber and Timothy J.D. Hennessy.

Dr. Martha Schreiber holds Ph.D.’s from Delft University of Technology and Technical University of Vienna and holds a Diploma in applied chemistry. Dr. Schreiber is Head of business activities for Funktionwerkstoffe F & E GmbH, based in Burgenland, Austria, a government funded research and development firm. Dr. Schreiber is in charge of strategic business planning and management of innovative projects and structuring national and International co-operation with other research establishments and business enterprises. Dr. Schreiber has also served as a consultant for the Electric Power Research Institute, California.

Mr. Timothy Hennessy, who has a Master of Science & Engineering, a B.Sc. Engineering and a B. Comm. Majoring in Economics and Quantitative Management, has held positions including Senior Engineer/Divisional and Quality supply Manager – Eskom, V.P. of Energy Services Affiliate – PacifiCorp, V.P. of Engineering and Operations, Managing Director - Lectrix LLC., Founder and Principal of Power Quality Technology (PQT). Mr. Hennessy has extensive experience assessing designing and developing new technologies, project management, and financial modeling. Accomplishments include the creation and implementation of large-scale Power Quality Solutions, including superconductor energy storage and hybrid power-electronic solutions. Mr. Hennessy has also published and presented 20 international technical and economic papers as well as editing of the Power Quality Blue Book (South Africa), a text for engineers in industry.

Based in Vancouver, B.C., Vanteck is an alternative electrochemical energy storage company that has commercialized the patented Vanadium Redox Battery (VRB) Energy Storage System. The VRB is a technology that effectively stores and delivers electricity on demand, improves power reliability, power quality and reduces costs associated with applications for load leveling, peak shaving, and the supply of essential Uninterruptible Power Systems. Characterized by low ecological impact, the VRB technology uses conducting plastic electrodes and contains no heavy metals. The complete unit, known as the VRBPower System, has mobile design capabilities, allowing the unit to be relocated as may be needed in the future. Vanteck is listed on the TSX Venture Exchange (“VRB”), the OTC Pink Sheets (“VTTCF”) and on the Frankfurt Exchange (“VKN”).

Press Release Correction

Vancouver, B.C. (November 4, 2002) – Vantek (VRB) Technology Corp. (“Vantek”) reports that the November 1, 2002 press release incorrectly stated the price of the warrant at \$0.12. The warrant will entitle the holder to acquire one common share of Vantek at a price of \$0.10 per unit for a period of one year.

Vantek also wishes to clarify that the granting of 800,000 employee incentive stock options are for new directors, employees, principal consultants, and advisory board members, and that none were allocated to existing management and directors.

Based in Vancouver, B.C., Vantek is an alternative electrochemical energy storage company that has commercialized the patented Vanadium Redox Battery (VRB) Energy Storage System. The VRB is a technology that effectively stores and delivers electricity on demand, improves power reliability, power quality and reduces costs associated with applications for load leveling, peak shaving, and the supply of essential Uninterruptible Power Systems. Characterized by low ecological impact, the VRB technology uses conducting plastic electrodes and contains no heavy metals. Vanteck Update

Vancouver, B.C. (November 1, 2002) – Vanteck (VRB) Technology Corp. (“Vanteck”) is pleased to announce that it has negotiated, subject to regulatory acceptance, a non-brokered private placement of 10 million units of Vanteck at a price of \$0.10 per unit. Each unit is comprised of one common share and one common share purchase warrant with each warrant entitling the holder to acquire one Vanteck common share at a price of \$0.12 per unit for a period of one year. This private placement will provide Vanteck with gross cash proceeds of \$1,000,000. The proceeds of the private placement will be used to fund the completion of the PacifiCorp project and general corporate use.

Vanteck also announced today, that a team from the University of New South Wales, Highveld Steel and Vanadium, and TSI-Eskom, managed by a major American engineering/construction contractor, will be completing the installation of the VRBPower System for PacifiCorp. Vanteck’s former technical consultants, Telepower Australia, will not be returning to the site.

Vanteck also wishes to announce, subject to regulatory acceptance, the granting of 800,000 employee incentive stock options exercisable at \$0.10. These options will be valid for a term of five years.

Based in Vancouver, B.C., Vanteck is an alternative electrochemical energy storage company that has commercialized the patented Vanadium Redox Battery (VRB) Energy Storage System. The VRB is a technology that effectively stores and delivers electricity on demand, improves power reliability, power quality and reduces costs associated with applications for load leveling, peak shaving, and the supply of essential Uninterruptible Power Systems.
